FLUIDS & LUBRICANTS

BELT GUARD

Depending on the road construction job site the conveyor belt faces volumes up to 1000 tons of asphalt per hour. Without appropriated maintenance this tremendous material flow has a major impact on the conveyor belt and leads to wear and asphalt deposits. Thus, this material stress requires an appropriate treatment in order to prevent a reduced lifetime of the belt. Further more, an unmaintained conveyor belt can impact the paving result negatively. Defects in the asphalt surface require time consuming and cost intensive rework and can be prevented by the use of Belt Guard. Thus, we recommend to consider regular belt cleaning with Belt Guard as part of the whole asphalt paving process.

BELT GUARD BENEFITS

- » High cleaning efficiency
- » Economical in use
- » Release agent
- » Easy to use-> Fill the tank and spray
- » Optimally harmonized with the spray system
- » Biodegradable

DYN@LINK

Dynapac provides with Dyn@Link customers with a tool to monitor and manage their machine fleet efficiently and conveniently. The intelligent telematics system offers many possibilities to optimize fleet usage, reduce maintenance costs and save time and money.

3 VERSIONS AVAILABLE

The telematics Dyn@Link system is available in three versions:

- » Dyn@Link,
- » Dyn@Link Advanced and
- » Dyn@Link Pro.

All systems include the hardware with sim-card, webpage access and a 36-month data connection package, which can be extended after 3 years.

»»» Dyn@Link Pro*

Paving parameters linked to geographical location

- » Working width
- » Layer thickness
- » Asphalt temperature

Interface with BPO from Volz Consulting GmbH

»»» Dyn@Link Advanced

Fuel Consumption

Machine Parameters

- » Engine parameters
- » Distance travelled

Remote diagnostic

» Dyn@Link

Working hours

Maintenance schedules

Geofence

* Available on large asphalt pavers, additional sensors might required

CUSTOMER BENEFITS

- » Better fleet management (location and geofencing) Dyn@Link Advanced and
- » Improved service planning
- » Quick remote service diagnostics
- » Customized alerts
- » Improved process control (fuel consumption)
- » Easy integration with existing customers fleet monitoring systems

DYN@LINK

GEOFENCE

After setting up a geo-fence, the system automatically notifies Dyn@Link users when a machine enters or leaves a predefined area. Thanks to the geo-fence function in Dyn@Link, Dyn@Link users can keep track of the whereabouts of their machines, even when not logged in to the web page.

REPORTING FUNCTION

Dyn@Link allows users to set-up automatic reports on a daily, weekly or monthly basis. This provides useful information on fuel consumption, usage and service status to fleet managers and others.

ALL MACHINE INFORMATION AT A GLANCE

All machines, together with important information such as position, fuel and Ad-blue levels, service status and map view, are listed on the dashboard. Thanks to the online portal and the Dyn@Link app, users can access this information from anywhere and at any time.

MODULES

Product	P/N
Dyn@Link basic pavers	4812014000
Dyn@Link advanced pavers	4812013999

*Subscription for 36 months

DYNAPLUS

The DynaPlus Program offers a variety of products to cover different market and customer needs. Choose from extended warranties providing coverage from one to two years beyond your regular warranty.

WHY BUY?

An extended warranty gives you peace of mind and helps you control the cost of maintaining your Dynapac equipment. Add it to a Dynapac Service agreement to ensure your equipment is maintained at optimum levels and protected throughout its life cycle.

WHEN BUY?

An extended warranty can be purchased at the same time as your machine order or up to nine month after machine commissioning date (or machine exceeds 1 000 operation hours, whichever occurs first).

DYNAPLUS12

DynaPlus12 is covering main components (hydraulic pumps, hydraulic motors, gearboxes, master box and display for PLC systems) and the Diesel engine. The extended warranty ends one year after the end of the regular warranty or when the machine has a total of 2 400 hours on it, whichever occurs first.

DYNAPLUS24

Same coverage as DynaPlus12 first year. Coverage of main components excluding Diesel engine during second year. The extended warranty ends two years after the end of the regular warranty or when the machine has a total of 3 600 hours on it, whichever occurs first.

Dynapac genuine parts are to be used. Fluids, maintenance and wear parts are not covered in DynaPlus program. If other than Dynapac genuine parts are used or unauthorized modifications carried out, DynaPlus extended warranty for the entire product is void.
-> please note the DynaPlus policy

DISTRIBUTION CENTRES

DYNAPAC NORTH AMERICA

Pilot Logistics
8910-D Pioneer Ave
Charlotte, NC 28273

DYNAPAC DISTRIBUTION CENTER GLOBAL

Wahrbrink 25
59368 Werne
Germany

DYNAPAC GLOBAL PRESENCE

Dynapac offers parts through three major distribution centres located in Werne (Germany), Charlotte (US) and Tianjin (China). These distribution centres stock parts for all products in market and support our regional service centres as well as dealers.

DYNAPAC CHINA

- No. 38, QuanWang Road
- WuQing High Tech Industrial Park
- 301700, Tianjin

The distribution centres are our logistic competence centres where we have implemented state of the art systems for inventory management, transport strategy as well as breakdown management.

SERVICE COMMITTED

WHAT?

GENUINE PARTS AND KITS

- PREVENTIVE MAINTENANCE KITS
- GENUINE FILTERS
- FLUIDS AND LUBRICANTS
- WEAR AND REPAIR KITS
- UPGRADE KITS

SERVICE

- RIGHT COMPETENCE
- TRAINING PROGRAM
- INSPECTION & SERVICE PROGRAM
- EXTENDED WARRANTY & SERVICE AGREEMENT

CONSUMABLES

- GREASE
- COOLANT

HOW?

GLOBAL DISTRIBUTION NETWORK

- ALWAYS CLOSE TO YOU

DYNAPAC.COM

- KIT SELECTOR
- FLUID SELECTOR
- SHOP ONLINE

DYN@LINK

- MANAGE YOUR FLEET
- TIMELY INTERVENTIONS PLANNED
- SERVICE ALERT

PREVENT THE COST OF A BREAKDOWN

REGULAR MAINTENANCE PREVENTS COSTLY STANDSTILLS
Equipment breakdowns have a direct impact on your productivity. No production means no revenue, but the fixed costs stay the same, resulting in lower profitability. By avoiding breakdowns and increasing the reliability of your machine, you will be able to produce more per year, which will immediately improve your profitability.

PREVENTIVE MAINTENANCE PAYS BACK

- Timely intervention to avoid expensive breakdowns
- High quality maintenance also means higher resale value (residual value)

PREVENTIVE MAINTENANCE KITS

PREVENTIVE MAINTENANCE KITS
All in one box and tailored to match your equipment. Easy to obtain and attractively priced, our preventive maintenance kits contain all the parts required for the equipments scheduled maintenance program. When installed by one of our certified technicians, you keep equipment downtime to a minimum and its uptime to a maximum throughout its working life.
