April 2026

Dynapac bids farewell to the last SD2500CS large paver with a joint celebration

Wardenburg, April 8, 2026 - A special moment marked the end of production of the proven SD2500 series at the Wardenburg plant: The final paver has successfully rolled off the production line, marking a true milestone in the company's history since its start in 2019.

In bright sunshine, employees gathered to celebrate the occasion together. As a sign of unity, all staff members, including the entire Dynapac management team, signed the side door of the last machine. In his speech, Mathias Kayser, Plant Manager of Dynapac Wardenburg, honored this special moment and thanked the teams for their commitment and outstanding work. M. Jean-Claude Fayat, President of the Fayat Group, also made a point of signing in person. Dynapac has been part of the French construction group Fayat Group since 2017.

Afterwards, everyone raised a toast to their shared successes over bratwurst and in good spirits, before a large group photo captured the event.

The farewell to the SD2500 series is bittersweet. At the same time, this ending creates space for the future: with the new SD25 series, including a fully electric large paver, the PROTAC Spraypaver, and the IMIX Feeder, the site is consistently aligning itself with future requirements and innovations.

The company looks back with pride on the past years and forward with great confidence – ready for the next chapters of its success story.

Dynapac is a leading supplier of high-tech soil and asphalt rollers, light equipment, and pavers committed to strengthening customer performance by being a partner on the road ahead. Dynapac is represented worldwide via its regional sales- and service offices and cooperates with an extensive and professional distribution network. Headquartered in Wardenburg, Germany, Dynapac has production facilities in Europe, South America and Asia. Dynapac is part of the FAYAT Group.
